PROFESSIONAL SUMMARY

Frontend Engineer with 2+ years of experience building enterprise-grade fleet and transit platforms at MapMyIndia - serving 200,000+ users and 50,000+ live vehicles. Specialized in Angular (v14-v19), Ionic, RxJS, and NgRx, with a track record of 30–70% performance improvements through offline-first architecture, intelligent caching, and real-time data optimization. Looking for frontend roles in product-led or B2B SaaS companies.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3 / SCSS

Frameworks & Libraries: Angular (v14-v19), Ionic, Capacitor, RxJS, NgRx

Performance: OnPush change detection, Lazy Loading, Web Workers, SQLite caching, IndexedDB

Testing: Jasmine, Karma

Storage & Database: IndexedDB, SQLite, MongoDB

Tools & DevOps: Git, GitHub, GitLab, GitLab CI/CD, Postman, Figma, Jira

Cloud & Methodologies: AWS (basics), Agile / Scrum, REST APIs, RBAC

WORK EXPERIENCE

Software Engineer | **MapMyIndia (CE Info Systems Ltd.)**, New Delhi *June 2023 – Present*

- Led frontend development for enterprise fleet and transit platforms serving clients including **MSIL, IOCL, and state governments**, supporting real-time operations for **200,000+ end users**
- Developed scalable **Angular/Ionic** applications handling high-frequency live data streams for **50,000+ vehicles** across web and mobile, using RxJS observables and NgRx state management
- Integrated and standardized **100+ REST APIs**, building shared interceptor layers that improved UI responsiveness and reduced per-feature integration effort
- Designed reusable component libraries and enforced **NgRx-based state management** patterns, improving scalability and reducing codebase complexity
- Enhanced application performance optimization using Chrome DevTools and Lighthouse, reducing average load time by **30%**
- Upgraded Angular applications from **v14 to v19**, adopting standalone components and improving build times and long-term maintainability
- Collaborated with backend engineers, UX designers, and product managers in an Agile/Scrum environment across multiple simultaneous product tracks

KEY PROJECTS

Indane Yatra Mitra (IOCL) — *Ionic · Angular · Capacitor · NgRx · SQLite* Google Play Store ↗

- Owned end-to-end frontend for IOCL's national fleet platform tracking **26,000+ live vehicles** with real-time updates across web and mobile
- Architected high-performance data pipelines using **NgRx + Web Workers**, eliminating UI thread blocking under heavy telemetry loads
- Optimized load time by **~70%** through SQLite-based offline caching and optimized map rendering, enabling smooth performance at enterprise scale
- Engineered **RBAC-secured dashboards** and operational analytics for multi-role enterprise access control

Intouch NextGen (MapMyIndia) — *Angular · NgRx · IndexedDB · eCharts* Live App ↗

- Reduced dashboard load time **from 15s to under 3 seconds** by implementing IndexedDB-based caching for 50MB+ datasets - the single highest-impact performance win on the platform
- Built real-time analytics interfaces and fleet insight dashboards for enterprise fleet configuration management
- Structured modular CRUD modules aligned with scalable architecture for complex enterprise workflows

MSIL Employee Commute Tracking App (MSIL) — *Ionic · Angular · Mappls Maps · Firebase*

- Developed live shuttle tracking with continuous location updates, ETA display, and polyline route visualization for Maruti Suzuki employees
- Integrated **Firebase push notifications** for real-time trip alerts and stop-level updates, reducing missed-shuttle incidents

EDUCATION

Master of Computer Applications (MCA) *Sept 2024 – June 2026*

Manipal University, Jaipur | Expected June 2026

Bachelor of Science — Computer Application *Sept 2020 – May 2023*

St. Xavier's College, Ranchi | CGPA: 8.41 / 10
